Access Tokens

User Access Tokens

Access tokens authenticate your identity to the Hugging Face Hub and allow applications to perform actions based on token permissions. ⚠️ **Do not share your Access Tokens with anyone**; we regularly check for leaked Access Tokens and remove them immediately.

5. Click on **Create new token** button.

[+ Create new token](#)

4. Click on the **Access Tokens** tab.

Name	Value	Last Refreshed Date	Last Used Date	Permissions

Token type

Fine-grained Read Write

ⓘ This cannot be changed after token creation.

Token name

Token name

User permissions (AofPammya)

Repositories

- ☐ Read access to contents of all repos under your personal namespace
- ☐ View repository names
- ☐ Read repository contents
- ☐ Write access to contents/settings of all repos under your personal namespace

Inference

- ☐ Make calls to inference endpoints
- ☐ Make calls to inference endpoints
- ☐ Manage your inference endpoints

Webhooks

Collections

6. Give it a Token name (e.g., "Dev-Test").

- ☐ Write access to contents/settings of all repos in selected organizations

Org settings

- ☐ Read access to organizations settings
- ☐ Write access to organizations settings / member management

Resource Groups

- ☐ Write access to resource groups in selected organizations
